Reed's Apple Cider is naturally brewed from fruits, herbs, roots and spices, which are aged like wine. With its sparkling filtered water, apple juice, fresh ginger root, lemon juice and cinnamon you would never know it is non-alcoholic. For Apple Cider fans **Reed's** Spiced Apple Cider could give others a run for their money. But even being a big fan of cinnamon this was a little too overwhelming. I could not see myself buying a 6-pack of Reed's Spiced Apple Cider.
